DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 20 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 20, line 4 discloses a “separate liner means” and in lines 7 and 8 “that portion of the liner bonded to said front panel separates from said liner means” which were not disclosed on the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-26, 103, and 104 are rejected under 35 U.S.C. 102(b) as being anticipated by Ours et al. (6,145,736).

Ours discloses a process for making a dispensing assembly comprising carton means having a dispensing opening in a side wall thereof, a pour spout means mounted in the dispensing opening and including a front panel; a separate liner means in the carton; bonding the liner means to the front panel whereby upon initial opening of the pour spout means a portion of

Art Unit: 3721

the liner bonded to the front panel separates from the liner means providing access to the interior thereof (column 10; claim 11).

Regarding claim 21: the pour spout means front panel comprises a lamination of a paperboard material and a plastic material (Figs. 14 and 16B; via 9d and 9f; column 6, lines 49-54).

Regarding claim 22: wherein the plastic material comprises a polyester material (Figs. 14 and 16B; via 9d and 9f; column 6, lines 49-54).

Regarding claim 23: further comprising a coating layer on said plastic material (column 1, lines 23-25).

Regarding claim 24: wherein said coating layer comprises polyethylene (column 3, lines 1-3).

Regarding claim 25: wherein said bonding said liner means to said front panel comprises bonding said liner means to said coating layer (Fig. 16B).

Regarding claim 26: further comprising forming at least one cut line in said coating layer (Fig. 21).

Regarding claim 103: wherein said pour spout means further comprises a first wing portion, and a second wing portion (Figs. 3 and 6; via 7 and 7'').

Regarding claim 104: wherein said first wing portion is attached to said front panel at a first fold line and said second wing portion is attached to said front panel at a second fold line (Figs. 6, 7, 15A; via the fold lines between side panels 7 and access panel 5).
